

The AIRE GUARDIAN® AG3000MCKK Mobile Containment Cube

Contain & Control Dust, Debris & Other Airborne Particulates
When Working Above Drop Ceilings or Inside Wall Cavities

Durable. Versatile. Economical. User Friendly. Lightweight.

AIRE GUARDIAN® AG3000MCKK Mobile Containment Cube

The AIRE GUARDIAN MCKK Mobile Containment Cube is an effective tool for negative-pressure containment of particles released into the air during work in ceiling or wall cavities. Its exceptional mobility makes it ideal for jobs where the cube must often be moved within the facility, such as running cable. Components include: an aluminum frame, with a top frame, a base, and four spring-loaded, upright poles; a fire-retardant PVC enclosure; and an aluminum cart.

The lightweight enclosure is made from a tough reinforced PVC material used to make military tents for harsh outdoor environments. Features include:

- Large zippered entry/exit doors on 3 sides
- Zippered top, for full access above drop-ceilings
- Double thickness floor for added strength & durability
- Zippered openings on 2 sides for wall cavity access
- Large, clear plastic windows on all 4 sides, for visibility
- Clear pouch for work orders and other documents
- Pass-through opening with a removable cover
- Portable air scrubber and HEPA vacuum ports
- Dimensions: 30" x 60"

Fast And Easy Assembly...

One person can assemble the AIRE GUARDIAN MCKK and have it ready to use in minutes. Color-coded alignment dots show clearly how components fit together, and the blue floor makes it simple to orient the enclosure around the frame.

And, Easy To Use

AIRE GUARDIAN MCKK is easy to roll to the job site, fully assembled. It can be safely used while still mounted on the 900-pound capacity cart, with the caster foot brakes locked; or, the frame and enclosure can be removed from the cart and placed on the floor. The convenient and easy to use height-adjustment knob and the numbered slots etched into each pole ensure that each pole is set to the same height setting. The fully assembled AIRE GUARDIAN MCC is plenty large enough to accommodate a worker on a 6-foot or 8-foot ladder.

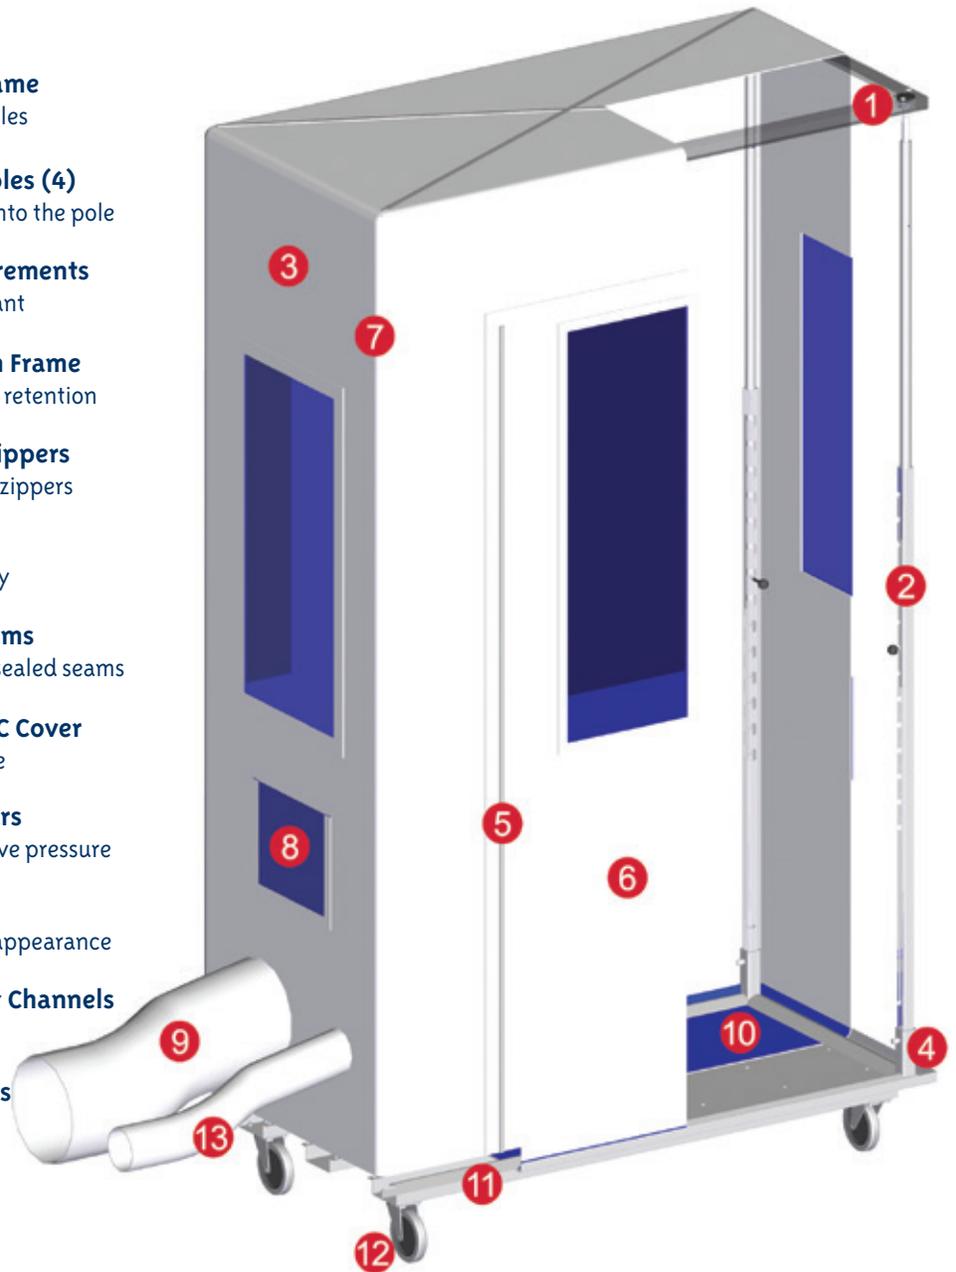

PRED750 Portable Air Scrubber & AG-CADDY cart are sold separately.

AG3000MCK Features:

- 1. Corrosion-Resistant Aluminum Top Frame**
Corner sockets snap in place over upright poles
- 2. Adjustable, Spring-Loaded Upright Poles (4)**
Numbered height settings are etched right into the pole
- 3. PVC Enclosure Meets Fire Safety Requirements**
NFPA, CDC, JCAHO, & CA Fire Marshall Compliant
- 4. Corrosion-Resistant Aluminum Bottom Frame**
Corner sleeves & locking pins for secure pole retention
- 5. Reliable & Durable Non-Binding Coil Zippers**
Heavy-duty, won't bind and catch like tooth zippers
- 6. Large Zippered Side Doors on 3 Sides**
Easy exit or entry, & maximum user versatility
- 7. Reinforced, Ultrasonically Welded Seams**
Stronger & more reliable than sewn or heat-sealed seams
- 8. Outer Work Order Pouch with Clear PVC Cover**
Documents are protected, and readily visible
- 9. Air Scrubber Port for 8"-12" Inlet Collars**
Reinforced to prevent collapse under negative pressure
- 10. Extra Heavy-Duty Blue Floor Fabric**
Color-coded for easier assembly, retains its appearance
- 11. Mobile Cart with 3 Bottom Reinforcing Channels**
Added strength & rigidity when in use
- 12. Heavy-Duty 5" Casters with Foot Brakes**
Excellent mobility, strength & stability
- 13. HEPA Vacuum Port**
Fits up to 3" inlet hose

Top Corner Socket

Caster Foot Brake

Corner Sleeve & Locking Pin

Mobile ICRA Packages with AIRE GUARDIAN Containment Cubes

Mobile ICRA packages from Abatement Technologies are economical, effective and easy-to-use containment systems prepackaged specifically for work in areas above ceilings and in wall cavities. Two mobile ICRA packages are available to help your facility meet the requirements in the CDC Infection Control Guidelines (ICRA) and the Canadian CSA Z317-13-03. Types of activities that require these systems for work within walls and ceilings of healthcare facilities include jobs such as installing, inspecting, or maintaining:

- Electrical cables and components
- HVAC system components
- Fire protection systems

The most popular ICRA package (ICMOBVC) contains:

AIRE GUARDIAN® AG3000MCKK Mobile Construction Cube & AG-CADDY Cart

- Reusable mobile cube for particle containment
- Fast & easy wall and ceiling access all in one unit
- Precise height adjustments up to 10 feet
- Accommodates up to 900 lbs of evenly distributed weight
- Roomy enough to hold a worker with an 8 foot ladder
- Top closes & seals for full particle containment
- Caddy allows portable air scrubber to remain connected to the AIRE GUARDIAN module during transport

PREDATOR® Model PRED750 Portable Air Scrubber

- Compact and ultra-lightweight at 35 pounds
- Maintains high ACH & negative pressure levels inside the AG3000MCKK cube
- Airflow adjustable from 200 cfm up to 750 cfm
- 3-stage filtration with certified 99.97% HEPA filter
- Useful for many other jobs independent of the AG3000

V8000WD Portable Wet/Dry HEPA Vacuum

- 8 gallon wet/dry vacuum
- Equipped with HEPA filter and complete tool kit
- 135 cfm airflow; 92" static lift
- Removes particles to help decontaminate surfaces within the AG3000
- Powerful, yet exceptionally quiet

<i>ICRA Compliance Packages with AIRE GUARDIAN® Mobile Containment Cubes</i>		
<i>Kit Part Number</i>	<i>ICMOBVC</i>	<i>ICMOBKC</i>
<i>Maximum Containment Area in Cubic Feet</i>	7,500	7,500
